Comprehension:

INSTRUCTION: Read the passage carefully and answer questions 1 – 5 below

Olumba removed a small black amulet from his neck and substituted a bigger one. The former was for general protection at home, the later for protection and luck whilst travelling. Ready at last he picked up his machet and headed for the chief's house with Ikechi behind him.

Olumba walked ahead looking upward as usual. Just what he was searching for in the sky Ikechi couldn't tell. Perhaps, his shortness accounted for this habit since he often has to look up into the faces of his taller companions. What he lacked in height he made up in solid muscle and he looked strong. His wrestling pseudonym was Agadaga, a name which meant nothing but which somehow conveyed an impression of strength.

Eze Diali, the chief sat at one end of his reception hall ringed by the village elders whom he had called to a meeting. The rest of the hall was filled with much young men.

"People of Chiolu," the chief began, "I have learnt that poachers from the Pond of Wagaba which as you know is rich in fish. Our plan tonight is to bring one or more of these thieves home alive and ask for very large ransoms. This line of action will have two effects. Firstly, it will prove our charges of poaching against the people of Aliakoro, and secondly, the payment of very large ransoms would be a deterrent. We need seven men for this venture. I call for volunteers".

"Who will head this party?" the chief asked, looking around. Chituru, one of the elders said: "Eze Diali, let us not waste time. Olurnba is the man for the job. We all know that he has led many exploits like this one."

"We still need six men," Eze Diali said. Eager youths came surging forward. Their well-formed muscles rippled as they elbowed one another. It was difficult to choose.

"I suggest Olumba should choose his men. He knows the boys very well and his judgment should be reliable," it was Wezume, another village elder who spoke.

2014/2015 FUNAI POST UTME QUESTIONS

Answer all questions by marking the correct option in each question

Total Time Allowed: 1 hour

SECTION A

Read the passage below carefully and answer questions 1-5 that follow.

There is another interesting fact about eye movement. If you record the eye movements of someone who is reading, you will notice that, from time to time, the reader goes back and looks again at something he has read before, in other words, he regresses to an earlier part of the text, probably because he realizes he does not understand the passage properly. Then he comes back to where he left off and continues reading. At one time, it was thought that regression was a fault, but it is in fact a very necessary activity in efficient reading.

There are several different kinds of fault in reading, which are usually more exaggerated with foreign learners.

The most common one is that most people read more slowly than they should. There is no rate at which people ought to read, of course, it depends on your purpose in reading how difficult the language is, how unfamiliar the material is, and so on. But most people read everything at the same slow speed, and do not seem to realize that they can read faster or slower. Other people say the words to themselves, or move their lips—these habits slow the reader down to something near speaking speed, which is, of course, much slower than reading speed. Another habit which can slow you down is following the line with your finger, or with a pen.

If you want to be able to read faster, the secret is simply to practice under time conditions. This means that you should give yourself a certain amount of time to read with understanding, and then check your time when you have finished. Students who have practiced fast reading even for only an hour a week, have shown average improvements of over 50% over a term

often weeks' duration. Reading fast does not necessarily mean reading with less comprehension. In fact, students usually show a small increase in comprehension as well as a dramatic increase in speed.
